AYA BOCHMAN - FULL STACK DEVELOPER (REMOTE)

SUMMARY

I love creating and designing web applications from scratch and making an idea come to life with strong UX/UI principles. Experienced with developing projects end-to-end through all stages of a project's lifecycle, from design to production. Through my experience, I have developed effective communication skills with all of the different stakeholders of a project. I am eager to learn new technologies, building new applications and advance further in my field.

AREAS OF EXPERTISE

- React.js, Redux.js
- Node.js, MongoDB

- REST Architecture, API
- SSR with Next.js

EXPERIENCE

Full Stack Developer [React & Node.js] @Matrix

Working at Menora Mivtachim Insurance LTD

Menora Mivtachim LTD is one of Israel's five largest insurance & finance groups. The group specializes in asset management, manages the largest pension fund in Israel, is the largest General Insurer in Israel and the market leader in Motor Insurance sector.

September 2019 – now

- **Developing new digital processes and web applications from scratch** – being involved in the planning and architectural process of new applications. Consulting and collaborating with product managers.

- **Working in an Agile environment** - delivering products and features, as well as adapting to quick changes within a short amount of time.

- **Working in a lead team**- we took ownership over the most important web developments, such as the login page, clients capital transfers, clients personal dashboard, clients update details, etc. Our team spearheaded the digitalization of legacy procedures and migrated them to much more efficient and streamlined online options.

- **Had gone through rigorous QA protocols -** as our products are used in production by roughly thousands of users every day.

- **Maintaining our apps in production** – using Kibana as our log dashboard, business logs and technical logs. Releasing quick fixes and changes to production by demand.
